

PRESS RELEASE

Twin Tier Solar and Wind Partners with IBEW Local 241 on New Training Center

New solar system to be used for solar and electrical training and apprenticeships

ELMIRA HEIGHTS, NEW YORK – May 26, 2015 - Twin Tier Solar and Wind, a full service solar and wind energy company, headquartered in Elmira Heights, New York announced today that it is installing a 17.28 KW roof-mounted solar system on the recently acquired IBEW Local 241 Joint Apprenticeship Training Center, currently being renovated in Ithaca, New York. In addition to serving as the IBEW/NECA apprentice training center, the building will also house local union offices.

Twin Tier Solar and Wind LLC was created in 2009 to meet the rapidly growing demands for alternative energy products in the Twin Tier region of New York State. The company has expertise in design, procurement, installation and service of Photovoltaic (PV), solar energy solutions, as well as small wind solutions.

The new solar system will be used as a training tool for apprentices as well as other members of the local. Specifically, the system will include 64 solar panels with micro-inverters, all components being American-made. The estimated annual production of the system is expected to be 17,800 kWh, which will satisfy over 60% of the building's electrical needs.

"Twin Tier Solar and Wind is an active member of the IBEW, and we are very thankful for the opportunity to contribute to the new training center in Ithaca," said Lindsay Mills, president of Twin Tier Solar and Wind. "We believe in solar, and we know that it's good for our planet. We will continue to do what we can to proliferate the knowledge and skills necessary for the continued growth of solar."

Mike Talarski, business manager for the IBEW Local 241 stated, "At the local 241, we are committed to alternative energy. We are not only installing this solar system, but we are also converting to LED lights and putting in automatic on/off switches for some equipment and appliances. Basically, we are putting our money where our mouth is."

The solar system installation is currently underway and is expected to be complete by the end of May.

Twin Tier Solar and Wind is a wholly owned subsidiary of John Mills Electric, the Southern Tier's oldest electrical contractor, serving the area since 1946. The company is also a proud member of the North American Board of Certified Energy Practitioners, NABCEP CERTIFICATION #032611-87. Twin Tier installers are factory certified and all of their solar installations are supervised by in-house NABCEP certified personnel.

About Twin Tier Solar and Wind

For individuals and businesses wanting to save money on their energy bills, and at the same time recapture some of their federal and state income taxes, Twin Tier Solar and Wind provides the comprehensive alternative energy solutions that you are looking for.

Twin Tier constantly seeks out the best and latest solar and small wind technologies and provides them to customers at a competitive and affordable price.

Unlike other alternative energy companies, Twin Tier uses only high quality products, installed by our own professionally trained technicians, ensuring that our customers get the very best product possible.
