John Mills Electric Featured on 2020 Top Solar Contractors List

Elmira-based Company included on Solar Power World Top Solar Contractors List

ELMIRA HEIGHTS, NEW YORK – July 23, 2020 – John Mills Electric, a full service electrical contracting company, headquartered in Elmira Heights, New York announced today that it has been recognized by Solar Power World magazine for its solar installation efforts. This is the second year in a row that the company has received this honor. The magazine has published its list of 2020 Top Solar Contractors and ranked John Mills Electric number 82 of 407 companies. This ranking reflects an improvement of 11 positions over the 2019 ranking at #93.

John Mills Electric Large Solar Project in Tompkins County

The Top Solar Contractors list is developed each year by *Solar Power World* to honor the work of solar installers big and small. Solar firms in the utility, commercial and residential markets are ranked by number of kilowatts installed in the previous year. Companies are grouped and listed by specific service (developers, electrical subcontractors, EPCs, installation subcontractors, rooftop installers), markets and states.

"The *Solar Power World* team is so pleased to highlight more than 400 companies on the 2020 Top Solar Contractors list, especially during this unprecedented time," said Kelsey Misbrener, senior editor of *Solar Power World*. "All contractors featured on the 2020 list reported strong 2019 installation numbers and are continuing to stand tall this year."

The U.S. solar market has continued to thrive in 2020, with 3.6GW of new solar capacity added in the first quarter. However, with the impact of COVID-19, forecasts for Q2 solar demand is expected to decrease somewhat in year-over-year installation volumes.

"Over the past year, John Mills Electric and our subsidiary, Twin Tier Solar installed over 19MW of solar in the Southern Tier, both as an electrical contractor for large community solar developers, and on 'turn-key' projects," said Lindsay Mills, president of John Mills Electric. "We feel extremely fortunate that we continue to grow our renewables business, and we are very pleased to see the positive impact of renewables-based revenue to the Southern Tier."

About John Mills Electric

For individuals and businesses wanting electrical design, installation or repair services, John Mills Electric is the established and experienced leader in the Southern Tier.

John W. Mills, our founder, held honesty, integrity and professionalism as paramount in how he dealt with customers, vendors and employees. We ensure that these values are practiced today throughout our company.

Unlike other electrical contracting companies, John Mills Electric uses only high quality products, installed by our own professionally trained technicians, ensuring that our customers get the very best products and service possible.
