

PRESS RELEASE

Twin Tier Solar and Wind Installer Earns Industry's Most Prestigious Certification

Vincent Poole is now a NABCEP Certified PV Installation Professional

ELMIRA HEIGHTS, NEW YORK – June 10, 2015 - Twin Tier Solar and Wind, a full service solar and wind energy company, headquartered in Elmira Heights, New York announced today that Vincent Poole has earned the solar industry's leading recognition of installation expertise from the North American Board of Certified Energy Practitioners (NABCEP®), and is now a NABCEP Certified PV Installation Professional™.

Twin Tier Solar and Wind LLC was created in 2009 to meet the rapidly growing demands for alternative energy products in the Twin Tier region of New York State. The company has expertise in design, procurement, installation and service of Photovoltaic (PV), solar energy solutions, as well as small wind solutions.

NABCEP is the most highly respected and well established national certification organization for renewable energy professionals. Designation as a NABCEP PV Installation Professional is widely recognized to be the most important and meaningful certification of its kind in the solar industry.

“Earning the PV Installation Professional Certification from NABCEP is very gratifying,” said Vincent Poole. “Even though I’ve been installing solar for quite some time now, it feels good knowing that my skills and methods are up to industry standards. Additionally, our customers can be confident knowing that their photovoltaic system installations will be completed to the highest standards in the solar industry.”

To earn his NABCEP certification, Poole was required to first document relevant education and experience related to PV system installation. Then he had to pass a rigorous exam that covers the breadth of the multi-craft knowledge, skills, and abilities required to competently design, install, and maintain PV systems. The exam assesses knowledge on subjects as diverse as electrical and mechanical system design, job site safety, the National Electrical Code, roofing and construction techniques, and system maintenance and troubleshooting.

“One thing you can be assured of when hiring a NABCEP Certified PV Installation Professional is that your project won’t be their first,” said Richard Lawrence, Executive Director of NABCEP. “Anyone who makes the considerable effort required to earn NABCEP certification has documented their training and experience as part of the eligibility process. They have also made a very real commitment to upholding high standards of ethical and professional practice. I am delighted to welcome Vincent Poole of Twin Tier Solar and Wind to the ranks of the industry’s leading solar professionals.”

Twin Tier Solar and Wind is a wholly owned subsidiary of John Mills Electric, the Southern Tier's oldest electrical contractor, serving the area since 1946. Twin Tier installers are factory certified and all of their solar installations are supervised by in-house NABCEP certified personnel.

About Twin Tier Solar and Wind

For individuals and businesses wanting to save money on their energy bills, and at the same time recapture some of their federal and state income taxes, Twin Tier Solar and Wind provides the comprehensive alternative energy solutions that you are looking for.

Twin Tier constantly seeks out the best and latest solar and small wind technologies and provides them to customers at a competitive and affordable price.

Unlike other alternative energy companies, Twin Tier uses only high quality products, installed by our own professionally trained technicians, ensuring that our customers get the very best product possible.
